

Hi all,

More of a summary of my time in post over the last year really.

Firstly I would like to say thanks to everyone for making me feel welcome and has been an interesting eye opener into how the Plus organisation is currently operating and running.

I started out with best intentions and plans to really try and make some improvements and a difference within the area I was working, but sadly as time went on between progress being somewhat slow and hitting a few roadblocks along the way has made this a fair bit more challenging than I anticipated.

Within my time in post I have created a job description proforma as a rough guide for anyone wishing to do this position in the future and general information for NEC.

I wish you all well with your future positions and endeavours and look forward in catching up at local and national meetings and events.

Best regards

Craig.
